

**Build Educator Capacity:**

Educators engage in Orbis Numeracy training

**Continuity of Learning:**

Collaboration between preschool, reception and school leaders

**Explicit Teaching:**

Educators embed explicit teaching of number vocabulary and concepts

**Intervention:**

Educators collect data on each child to identify areas of need and support

**GOAL: To improve children's understanding and use of number to quantify**

*Challenge of practice: If we improve our explicit teaching of number vocabulary and concepts through play, then we will improve children's understanding and use of number to quantify*

*Success Criteria: Each child will use number vocabulary and concepts, such as more and less, subitising, touch counting, counting on, digit/numeral, etc. Each child will make choices, explore and problem solve with number vocabulary and concepts. Each child will use number vocabulary to communicate their understandings through learning and play experiences.*
